

Northern Wasco County PUD Providing Clearances for House and Equipment Moving

Where a house, structure, or equipment is to be moved upon, across or over roadways, or along a way over which electric wires are in place, advance notice in writing shall be made to the District of the dimensions of the object being moved, the time it will be moved, and the exact route over which it will be moved.

Payment shall be made in advance to the District of the cost providing clearance of electric lines for the move. Such payment shall be the estimated actual cost of the District personnel, plus overhead, equipment, and materials, required to provide the necessary clearance for the mover. All estimated cost shall be paid prior to the move being made.

In no case shall anyone other than authorized employees of the District remove, cut, raise, or handle any wires in connection with the moving and providing clearance.
